

## **PLAN FOR MEASURING IMPLEMENTATION**

### **Monitoring**

The superintendent will ensure compliance with established school district-wide nutrition and physical activity wellness policies.

In each school:

- the principal will ensure compliance with those policies in the school and will report on the school's compliance to the superintendent; and,
- food service staff, at the school or school district level, will ensure compliance with nutrition policies within food service areas and will report on this matter to the superintendent or principal.

In the school district:

- the superintendent will develop a summary report every three years on school district-wide compliance with the school district's established nutrition and physical activity wellness policies, based on input from schools within the school district; and,
- the report will be provided to the school board.
